

Introduction Group discussion E-tools seminar, 2019

Tim Tregenza, Network manager EU-OSHA

Why and how

To share experiences and knowledge, getting a perspective of the success factors and challenges of implementing tools in the OSH policy context

- Introduce yourself to each other
- Discuss each of the five topics
- Nominate your rapporteur
- Summarise your discussions on one sheet of flipchart paper

Questions for discussion

Policy	How can stakeholders be persuaded to integrate e-tools into OSH policy and practice?
Sustainability	How can e-tools move from being a short-term project to being a long-term action?
Feedback	How can “big data” from e-tools provide feedback into policy and practice?
Incentives	What incentives are needed to ensure end-users continue to use e-tools?
Future	What changes are likely to occur that will help or hinder the integration of e-tools into policy?
