EUROPEAN NETWORK OF SAFETY AND HEALTH PROFESSIONAL ORGANIZATIONS AND ITS ROLE

Mrs. Mireya Rifá Fabregat
ENSHPO President
email: president@enshpo.eu
The European Network of Safety and Health Professional Organizations

Which is our role?

SOLUTIONS:

PRACTICAL, AFFORDABLE THAT ARE CONSENSUAL AND IN ACCORDANCE WITH THE LAW

JOIN:

ACADEMIA/ INSTITUTIONAL RESEARCH WITH MARKET
REFLECTIONS:

1. Validity of measurements. They do not conform to the standards, there are no calibrations, so if an accident or occupational disease occurs, will these records be considered valid by a court or labour inspectorate? Lisbon University

2. When talking about trust and communication, the framework directive dates back to 1989 and it has not yet been possible to formulate a clear system of communication between the different actors, it cannot be left to the trust of the company and the worker.

3. The use of etools implies a very large investment in training in the use of them, is the generational difference in the use of etools accounted for? Gender? Nationalities?

4. We talk about the fact that they are very easy to connect and that we can manage them from our mobile phone, and even receive alarms, but we are mixing the private with the work, my phone, my smart watch,

5. Marketplace full of etools accessible to all companies who controls their quality?

6. It is not a PPE, and if an external element is added to a PPE it must be approved and certified.

7. Privacy and sensitive data management. They are not seen as a help but as an intrusion of our privacy that can be used against us, whether for regulatory compliance or other reasons. Data protection needs to be addressed in depth

8. No clear regulation, and agreement between all parties involved (trade unions, employers, governments, manufacturers...).
