

OSHWiki: connecting the OSH community

What is OSHWiki?

OSHWiki is a web platform based on the user-generated 'Wikipedia' style concept. It provides an ideal way to share specialised knowledge and collaborate online within the health and safety at work community.

Through OSHWiki you can quickly and easily learn about and contribute to a database of knowledge on OSH topics such as:

- OSH management and organisation
- psychosocial issues and work-related stress
- dangerous substances (chemical and biological)
- ergonomics

Who is it for?

OSHWiki articles can be written by accredited OSH professionals and scientific organisations, but everyone can access OSHWiki to reference the large variety of informative articles.

OSHWiki is an information source designed to support the needs of government, industry, employee and employer organisations, and others.

OSHWiki is your free online source for knowledge, information, and best practice support for occupational safety and health issues.

Why contribute to OSHwiki?

The top five reasons to start contributing today are:

- **Professional benefit** – get strategically involved in OSH knowledge development by commenting and building upon original articles.
- **Personal benefit** – gain personal recognition for the content you produce.
- **Networking** – contribute and debate with others in the OSH community.
- **Synergy** – gain visibility by linking your contributions to your work and the activities and initiatives of your organisation. Reuse your content for other purposes such as seminars.
- **Worldwide reach** – become a part of the worldwide OSH community with a platform that works in all languages.

How do I sign up?

Becoming an accredited author is easy. Simply fill in the online application form available on the OSHwiki main page and submit it to info@oshwiki.eu
