Purpose

The processing of personal data is necessary for the purpose of a survey with the aim of understanding how European workplaces manage safety and health risks in practice.

- Data subjects:

The survey addresses establishments with five or more employees in all sectors of the economy excluding households and extraterritorial organizations. Interviews will be conducted in 33 countries across Europe with the person who knows best about health and safety issues within the establishment.

- Data processor:

Kantar Public is in charge of conducting the interviews and processing the invitations and the replies to the survey for analysis purposes.

- Voluntary participation:

Participation in this survey is voluntary. Your data will be processed on the basis of the consent given by you. There will be no negative consequences for you or your organization if you choose not to participate in the study. If you participate, you will still be able to revoke your consent afterwards. Nevertheless, we would be very grateful if you could contribute to the success of this important research.

- Follow-up survey:

A follow-up study is planned in some organizations participating in the survey. At the end of the interview, you will be asked whether you would eventually be willing to take part in such a follow-up study. If you give us your consent to be contacted again for a possible follow-up interview, your name and address details will be stored with us until 31.12.2021 the latest and your data might be

transferred to another institute that will conduct the follow-up study. EU-OSHA will decide upon that institute only after this survey has been conducted. You can revoke your consent to be contacted for a follow-up interview at any time.
